Top performance at a variety of mowing heights.  
Excellent disease resistance and heat tolerance.  
Features upright growth with reduced grain.  
*Seeding rate: 1 - 1.5 lbs/1000 sq. ft.*

For tees, greens & fairways. This blend provides  
the perfect combination of performance and value.  
*Seeding rate: 1 - 1.5 lbs/1000 sq. ft.*

For use on tees & fairways. This blend provides  
great value at a great price.  
*Seeding rate: 1 - 1.5 lbs/1000 sq. ft.*

For new tees or overseeding into existing tees  
and fairways. Features a dense, upright, fine  
textured turf with excellent recuperative ability and  
disease resistance. Performs well at mowing  
heights as low as 1/2 inch.  
*Seeding rate: 1.5 - 3 lbs/1000 sq. ft.*

Designed specifically for golf course tees and  
fairways. Features a dense, upright, fine textured  
turf with excellent recuperative ability and  
disease resistance. Performs well at mowing  
heights as low as 1/2 inch.  
*Seeding rate: 2.5 - 4 lbs/1000 sq. ft.*

For new tees or overseeding into existing tees.  
Extremely durable with high disease and  
insect resistance.  
*Seeding rate: 3.5 - 5.5 lbs/1000 sq. ft.*

A premium blend of top performing varieties that  
feature insect resistance (high endophyte levels),  
excellent disease resistance as well as superior  
heat tolerance and mowability.  
*Seeding rate: 4 - 6 lbs/1000 sq. ft.*

Will provide hardy turf in full sun and in moderate  
shade in a wide variety of soil conditions.  
Performs well under moderate to low maintenance.  
*Seeding rate: 4 - 6 lbs/1000 sq. ft.*

Designed for areas that receive little or no sup-  
plemental fertilization or irrigation. An excellent  
choice for grass bunkers or fair roughs. In the  
unmown state, creates a "Scottish links" golf rough  
appearance.  
*Seeding rate: 4 - 6 lbs/1000 sq. ft.*
